- A 25% restocking charge will apply for all returned goods.

This is a solid steel lockable cabinet designed to house chemicals which are considered hazardous by classifications defined in the COSHH guidelines.

A raised sump at the base of the cabinet helps to prevent spillages inside, whilst a power coated finish is used to ensure durability and security when storing potentially hazardous chemicals as defined by guidelines in force as of June 2015.A reinforced door adds extra security to the cabinet, which comes fully assembled with a 3-point locking system, a set of 2 keys and an adjustable shelf.

Size

Unit	Height	Width	Depth
