Serve up hot, freshly made crepes with the Modena ECL2 16" dual crepe maker.

Efficient, easy to use, and complete with accessories, this crepe maker features dual burners for increased product output: more burners mean more crepes, and more crepes mean more profit! The unit's two elements operate independently, each with an adjustable thermostatic control to raise or lower the heat. Plus, a crepe spreader is included to help equip your business with the supplies needed to whip up the most delicious crepes around! This particular crepe maker requires 2 x 13amp plugs.
