The ventilated foodwarmer HV 120 GN is intended for restaurants, communities or caterers for the keeping warm of prepared dishes or plates.

This ventilated heating cabinet with double-door allows to heat up or to keep warm at right temperature (till 130 ° C) dishes prepared in Gastronorm GN trays or culinary preparations served on the plate. This true ventilated oven with insulated double-wall ensures a homogeneous heat in its enclosure. A reserve of water maintains the food soft to preserve all the flavors of dishes without drying.

Size

| Unit            | Height | Width | Depth |
|-----------------|--------|-------|-------|
| Mm              | 925    | 800   | 460   |
