If you'd like to add refreshing, fresh-squeezed orange juice to your menu, this Zoom ZO14 compact manual feed orange juice machine is a must for your establishment!

Whether you're operating a hotel, restaurant, or bar, this orange juicer is capable of providing quick and easy juice on-demand without taking up much of your kitchen or dining space. Capable of extracting the juice of up to 20 oranges per minute, and providing up to 30 litres per hour, speed is at the forefront of the features of the ZO14 juicer. The manual feeder can hold up to 6 oranges, so you don't have to worry about constantly reloading it. There is also a hopper on top of the unit that can hold additional oranges so that they are within arm's reach when it's time to reload the feeder. A removable filter will conveniently remove large bits and seeds from your juice as it is dispensed into your glass or jug for serving. The motor as well as the gears are made of stainless steel which will provide long-lasting durability and will hold up to heavy use. This unit requires a 13 amp socket for operation.

Size

Unit	Height	Width	Depth
Mm	780	400	300
Cm	78	40	30
Inches (approx)	30	15	11
