

Lite Toasters

Stylish and with an emphasis on convenience, the Lite Toaster offers patented functionality for an efficient kitchen. The Lite Toaster will make every breakfast a special occasion. Featuring Perfect Toast Technology, Dualit's patented innovation designed to produce slice after slice of consistently browned toast. The patented Peek & Pop® feature allows you to check your toast without cancelling the timing cycle, giving greater browning control. The Lite Toaster also benefits from a bagel toasting option, defrost function, extra-wide 36mm slots for thick sliced bread and automatic pop-up.

Stylish, Contemporary Look

The Lite Toaster boasts Dualit's signature styling, with a contemporary and modern twist, making this the perfect toaster to subtly update your kitchen. The Lite toaster is available in two contemporary and practical gloss finishes that are specifically designed to resist marking and stay cool to the touch.

Perfect Toast Technology

Get perfectly consistent, golden brown toast every time with Dualit's patented Perfect Toast Technology. This ingenious feature measures key variables such as toaster temperature, room temperature and how many slices have been toasted, to determine exactly how long your bread needs in the toaster. Undoubtedly the ultimate in precision controlled toast!

Peek and Pop®

Patented Peek and Pop® makes burnt toast a thing of the past. Lift the bread with the ejector lever while toasting to check your toast, then drop it back down, all without interrupting the toast cycle giving you greater browning control.

Product Spec:

- Available in Black or Cream
