

Care In Use

CHURCHILL

WOOD

Wood is a natural material which requires special care and handling to ensure the long life of the product.

Our oak and acacia products are natural hardwoods from sustainable sources. A food safe lacquer is applied to our wood to help to avoid water absorption when washing, it also helps to maintain its natural appearance. Wood may dry out with use, and although it is not necessary the occasional wipe with olive oil can also help to maintain its natural appearance. Wood naturally varies in colour and each piece is unique.

USES

- Recommended cleaning with a soft damp cloth.
- Store products in a dry location at room temperature.
- Suitable for direct contact with food, however ensure appropriate cleaning and aftercare.
- Heat resistant, suitable for carrying hot ceramic pieces removed direct from the oven.
- Dry immediately and thoroughly before stacking and storage.
